

TARANI ANTONY PRABHU JK

Chennai, India | antonymariyan7@gmail.com | +91-82483 75358 | [linkedin.com/in/tarani-antony-8a2013205](https://www.linkedin.com/in/tarani-antony-8a2013205)

PROFESSIONAL SUMMARY

Award-winning, security-focused IT professional with 4+ years of experience in endpoint hardening, firewall management, identity & access management, and SOC operations. Recognized as a **Rising Star** for delivering high-impact security initiatives within the first year. Independently engineered a suite of GenAI-powered security tools — including a real-time fleet monitoring platform, automated identity auditing across 60 SaaS tools, and SaaS spend intelligence — replacing commercial tooling and demonstrating a **Security-as-Code** mindset. Managed 3,000+ endpoints and supported 1,000+ users across multi-site operations.

Target Roles: SOC Analyst | Security Engineer | Security Operations Engineer

TECHNICAL SKILLS

Security Operations	SOC Operations, SIEM & Log Analysis, DLP Planning & Roadmapping, Anomaly Detection, Threat Monitoring, Incident Response, Shadow IT Discovery, Risk Assessment, IT Audit
Firewall & Network	FortiGate Firewall Management, Application Filtering, VPN Group Configuration, Whitelist/Blacklist Policy Enforcement, Network Segmentation, Network Protocol Security, Slack Alert Automation
Identity & Access Mgmt	JumpCloud (Provisioning, ABM, Custom Policies, Script Injection, User Groups), Google Workspace, Microsoft 365, Access Reviews, Identity Auditing, Least-Privilege Enforcement, HRMS API Integration
Endpoint Security & EDR	Jamf Protect (EDR), Jamf Trust (ZTNA), eScan, MDM Policy Enforcement, Patch Management, macOS/Windows Hardening, FileVault, BitLocker, Gatekeeper, SIP Enforcement
Cloud & SaaS Security	Google Workspace, Microsoft 365 (Exam 70-346), SaaS Spend Management, Software Onboarding Controls, Asset Inventory, Shadow IT Discovery
Security Engineering	GenAI-Assisted Tool Development, Python, Linux, React/TypeScript, Supabase, Claude AI API, Slack Webhooks, REST API Integration, ISO 27001, SOC 2

CERTIFICATIONS

🏆 **Google Cybersecurity Professional Certificate** — Google / Coursera

SOC Operations, SIEM, Chronicle, Python, Linux, Log Analysis

Network Security Certification — Great Learning

Network Protocol Security, Infrastructure Hardening

Introduction to Cyber Security — Great Learning

Foundational Security Concepts, Threat Landscape

Microsoft 365 Administration — Exam 70-346 — Microsoft

Identity Management, Cloud Security, M365 Administration

PwC US Audit Job Simulation — Forage / PwC

IT Audit, Control Assessment, Risk Identification & Remediation

PROFESSIONAL EXPERIENCE

Associate IT Admin
SurveySparrow — Chennai, India

February 2024 – Present

★ Rising Star Award 2024

Identity & Access Management

- Engineered and enforced least-privilege access policies across 300 users via JumpCloud, managing provisioning, device ABM, custom policy creation, user groups, and script injection workflows.
- Built a GenAI-powered Access Review Tool that replaced manual IGA processes across 60 SaaS tools — reducing the quarterly audit cycle from 4+ weeks to hours via HRMS API integration.

- Managed end-to-end user lifecycle for 10–12 users/month, ensuring zero access drift across all SaaS platforms post-departure.

Endpoint Hardening, EDR & MDM Security

- Hardened 320 endpoints (300 Mac + 20 Windows) using Jamf Protect (EDR) and JumpCloud MDM, enforcing security baselines and compliance configurations fleet-wide.
- Deployed Jamf Trust for Zero Trust Network Access (ZTNA), validating device compliance before granting network access.
- Architected Installomator — a GenAI-assisted patch pipeline via JumpCloud scripting — replacing ManageEngine Desktop Central across 300 Mac endpoints with real-time Slack alerts.

Firewall & Network Security

- Administered FortiGate firewall with weekly policy reviews, configuring application-layer filters, VPN access groups, and whitelist/blacklist enforcement rules.
- Engineered Slack-integrated FortiGate downtime alert automation, reducing mean-time-to-respond for network incidents.

SaaS Security, Shadow IT & DLP

- Built SpendNest, a GenAI-powered SaaS spend intelligence tool surfacing unauthorized applications and eliminating shadow IT.
- Leading DLP roadmap design aligned to ISO 27001, classifying sensitive data flows and drafting enforcement policies across endpoint, identity, and SaaS layers.

Associate IT Admin Skill Lync — Chennai, India

March 2021 – January 2024

Identity & Access Management

- Managed identity and access lifecycle for 1,000+ employees across Chennai, Hyderabad, and Pune using Google Workspace.
- Conducted quarterly access reviews, revoking excessive privileges and dormant accounts to maintain a least-privilege posture.
- Processed 10–12 onboardings/offboardings per month ensuring clean deprovisioning across all platforms.

Endpoint Security & Firewall

- Managed and secured 3,040 endpoints (3,000 Windows + 40 Mac) using eScan, enforcing security baselines at enterprise scale.
- Deployed custom scripts to detect and alert on unauthorized software installations fleet-wide.
- Administered FortiGate firewall across multi-site environment with app filtering, VPN controls, and Slack-based downtime alerting.

SECURITY ENGINEERING PROJECTS (GENAI-ASSISTED TOOLING)

All tools independently designed and built using GenAI · Codebase in private GitHub repository

SparrowVision — Device Health Monitoring & Fleet Security Platform

- Self-hosted full-stack platform (React, TypeScript, Supabase, Python) providing real-time device health, security posture, and compliance visibility across 300 Mac endpoints.
- Tracks FileVault, BitLocker, Firewall, SIP, Gatekeeper, MDM, and antivirus per device with Slack alerts and Claude AI-powered diagnosis.
- Evaluates SOC 2 and ISO 27001 compliance with per-device scoring dashboards, replacing commercial monitoring tooling.

Access Review Tool — Automated Identity Auditing

- Replaced a 4-week manual IGA process across 60 SaaS tools — HRMS exit data reconciled against active users via API, generating compliance-ready reports in hours.

Installomator — Automated Patch Management

- Replaced ManageEngine Desktop Central with an automated macOS patch pipeline via JumpCloud scripting and real-time Slack reporting across 300 endpoints.

SpendNest — SaaS Spend Intelligence & Shadow IT Discovery

- Financial audit tool mapping SaaS costs per business unit, surfacing unauthorized apps and supporting shadow IT reduction.

 App Watcher — *Compliance & Software Tracking*

- Real-time fleet-wide application compliance tracker flagging unauthorized or out-of-policy software for immediate remediation.

HONORS & AWARDS

 Rising Star Award (March 2024) — SurveySparrow

Awarded for dedication, passion, and excellence. Recognized as a top-tier performer within the first year.

 Dashing Debut Award — SurveySparrow

Recognized as a "rookie rockstar" for high impact and exceptional ramp-up speed in a security-critical role.

EDUCATION

Master of Science (M.Sc.) — Physics

St. Joseph's College

Tiruchirappalli, Tamil Nadu | Class of 2020
